OVERVIEW

Backend-focused Fullstack Developer with 7+ years of experience working in Data, Cybersecurity, and AI Applications. Enjoys working on personal projects constantly, with a knack for finding creative solutions to challenging problems.

SKILLS & ABILITIES

Python

Golang

AWS

C/C#

SQL

Docker

Javascript (Angular/Vue/React)

Scala

Gcloud

x84/x64 Assembly

NoSQL (Mongo/Neo4j/Gremlin)

Kubernetes

EXPERIENCE

THEMASONRY – LEAD BACKEND DEV

MAR 2021 – PRESENT

Single handedly brought the entire platform from conception to MVP. Handling over 1000 concurrent long-running tasks with a serverless AWS Lambda deployment. Set up untrusted code execution in a sandboxed, isolated environment with Judge0. Handled Vision, Transcription, and Data-based AI Analysis Tasks via OpenAI and Anthropic.

GAVEL – BACKEND CONSULTANT AND INTERNAL SUPPORT

FEB 2020 - PRESENT

Assistance with Doc-Generation automations in PDF, DOCX, and MD. Handling internal staff queries and bugs regarding the project. OAuth2 Implementations via Auth0 and Azure, among other IdPs.

THE JUST BRAND – SENIOR BACKEND DEV

MAR 2019 - PRESENT

Managing backends deployed across the Gcloud stack, in Python, Golang, and JS, handling UDP and TCP protocols with over 10,000 concurrent requests per second. Deployed and managing a self-hosted OAuth2 and OIDC server. Handling large and frequently accessed data via CloudSQL, Datastore, and Redis.

EXPERIENCE

BETTERLEGAL – LEAD FULLSTACK DEV

FEB 2019 - PRESENT

Handling E2E deployments of back and frontends across the AWS Stack in Python, Scala, Golang, C#, and Javascript. Built an internal platform for building Browser and Document automations with No-Code. Frequently creating internal security-audit reports. Recently crossed \$10M in annual revenue.

UPWORK – FREELANCING

MAY 2017 – DEC 2023

Experienced working on all kinds of projects, with clients all over the world.
